## Step:2

### Select Landing Pages for Free.

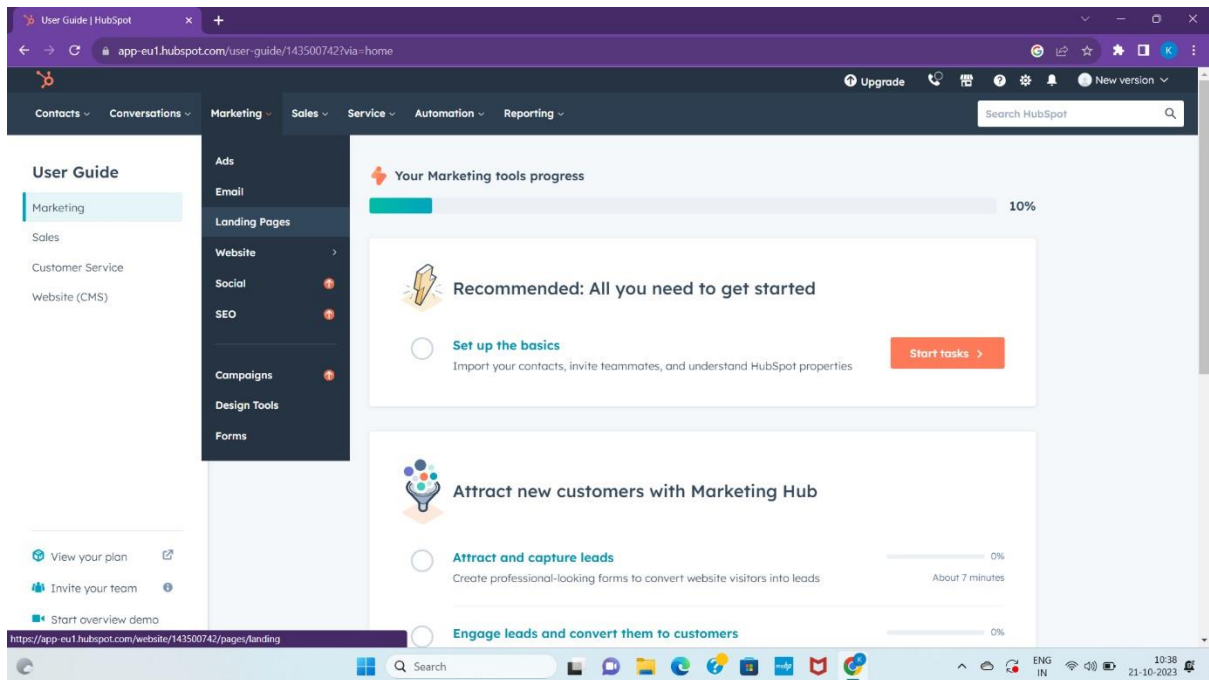

## Step 3:

### Sign Up with your Email Id'

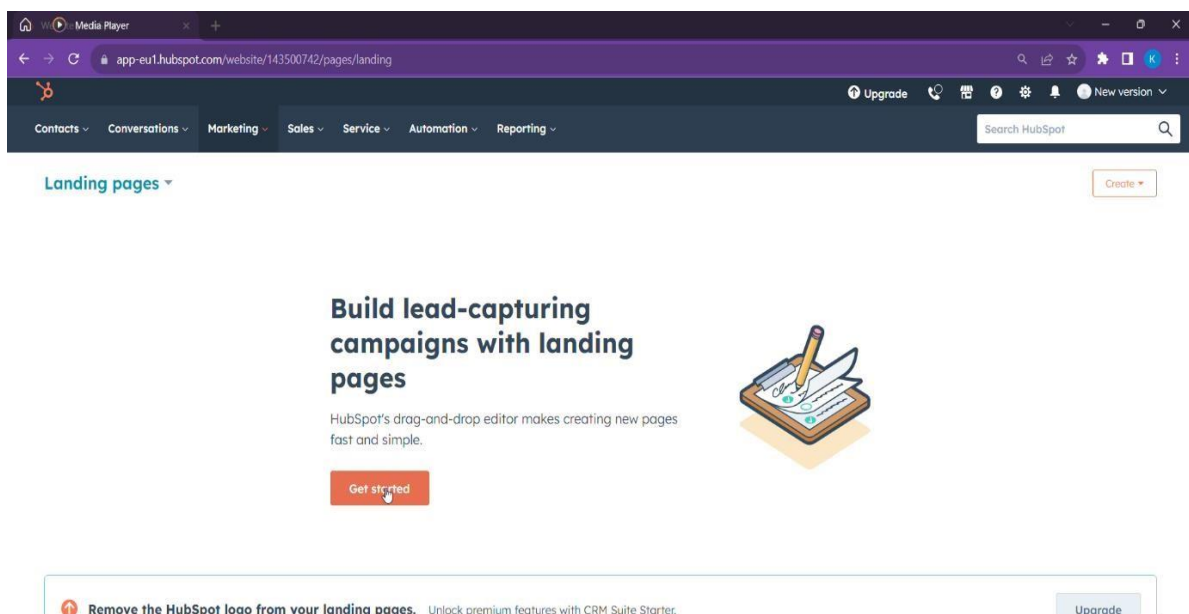

## Step:4

Click “Marketing” and select “Landing pages”.

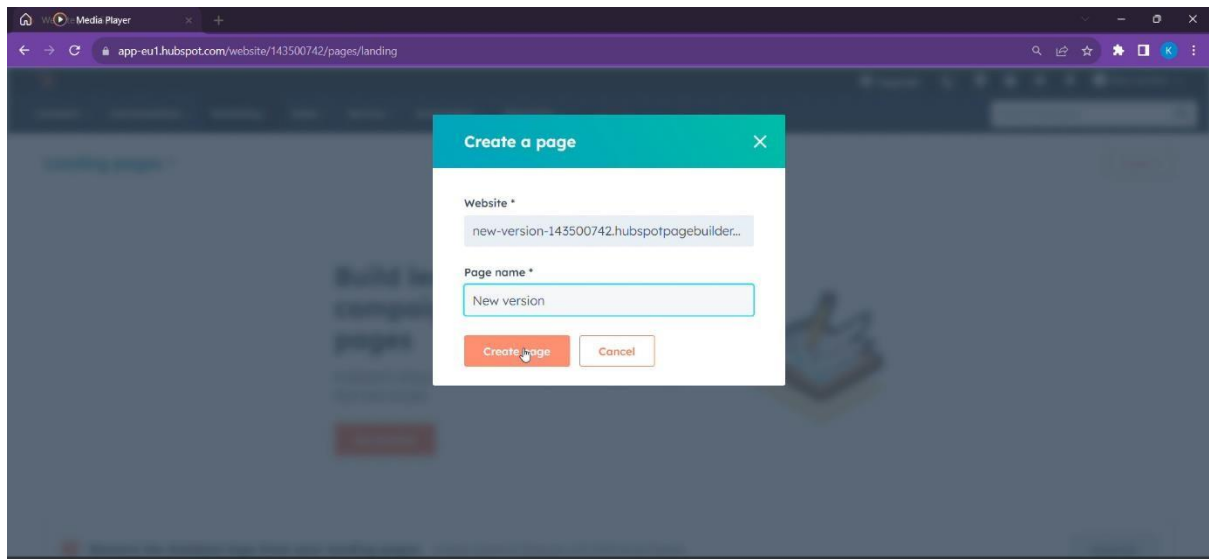

## Step 5:

Click “Get started”.

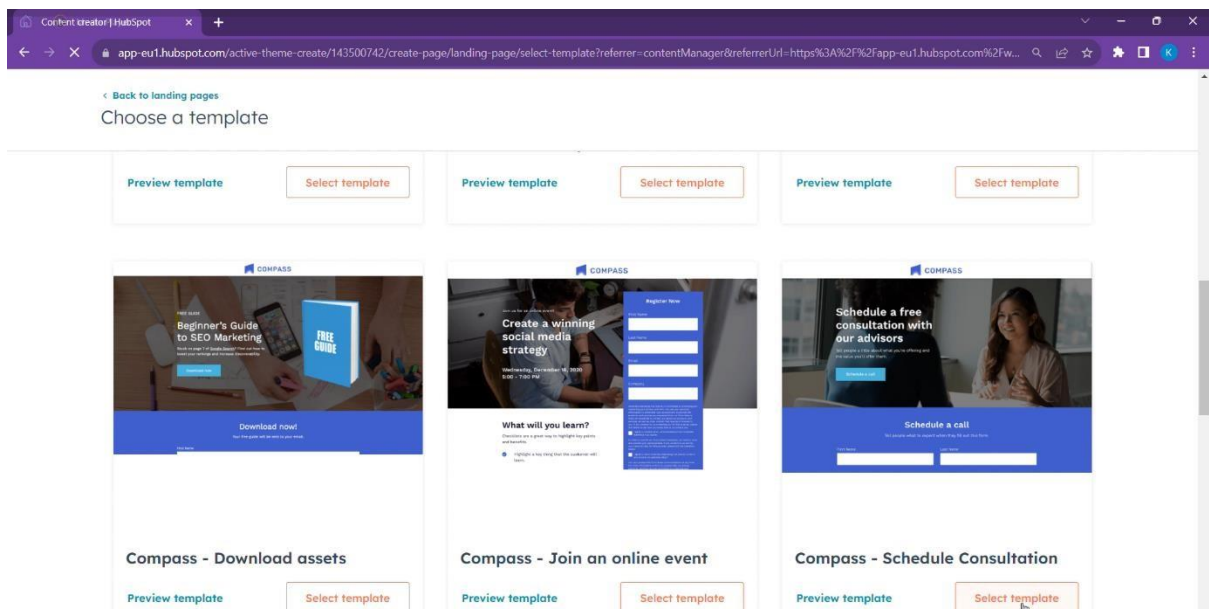

Step :6

Add Website page name and select “Create page”.

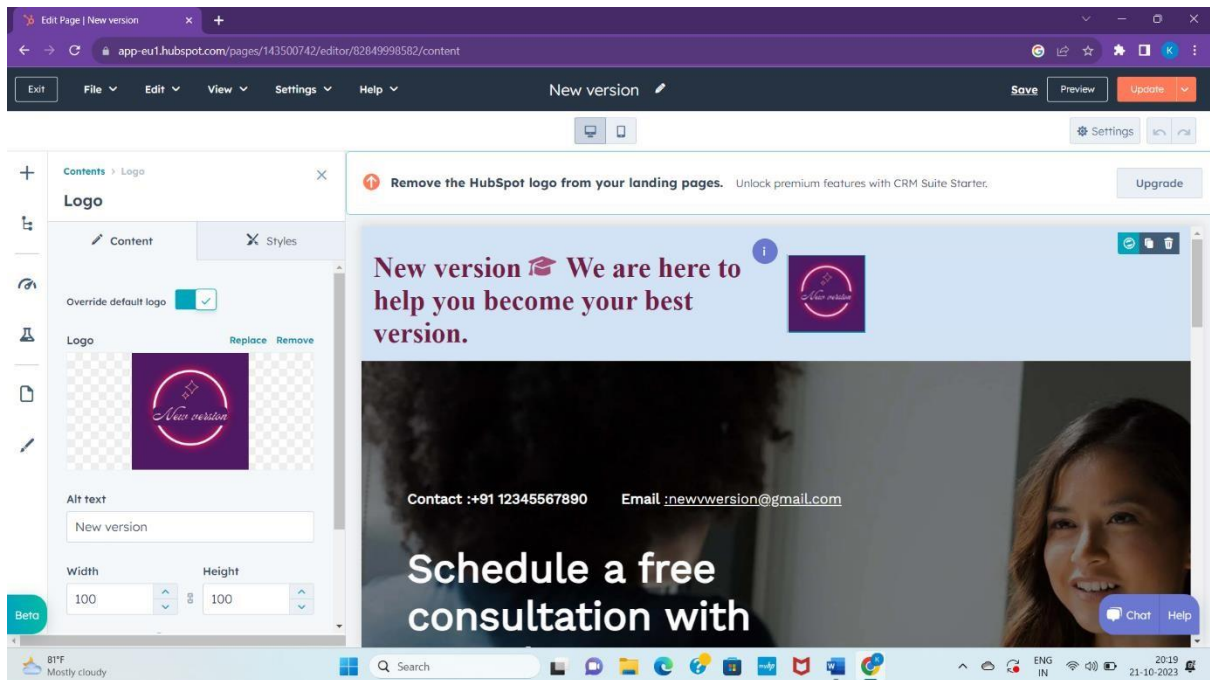

Step :7

Choose a template for your Landing Page.

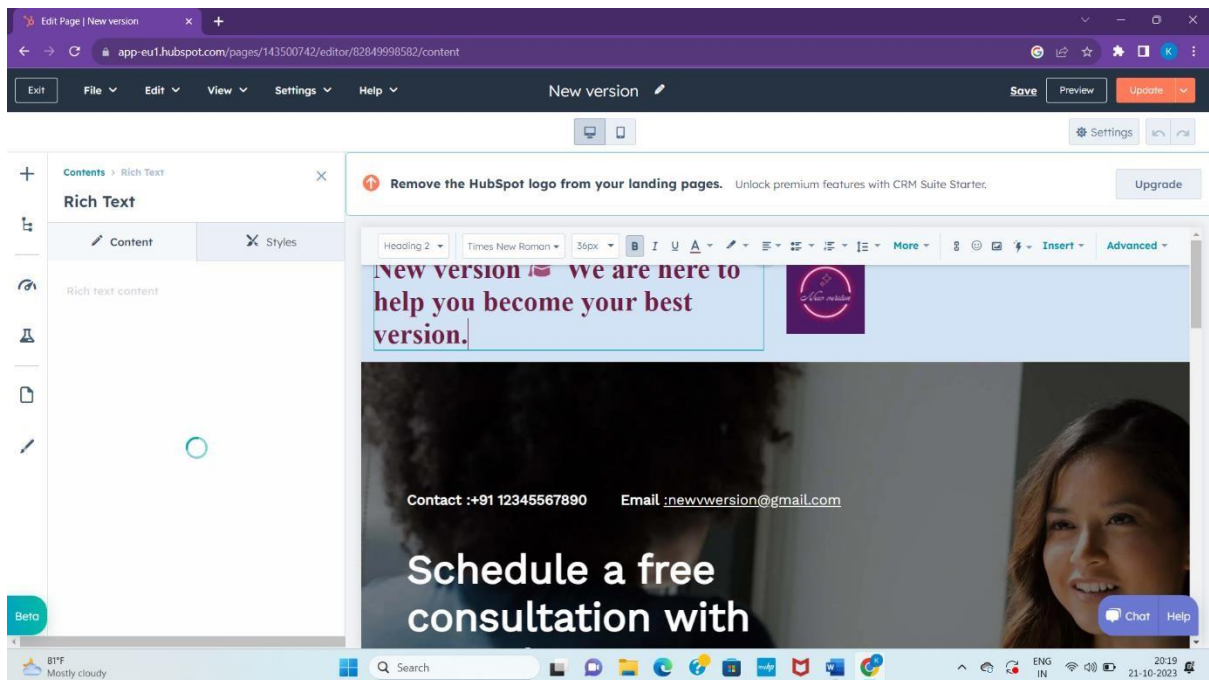

Step :8

Add logo.

Step :9

Add content about your brand.

Step :10

Select form.

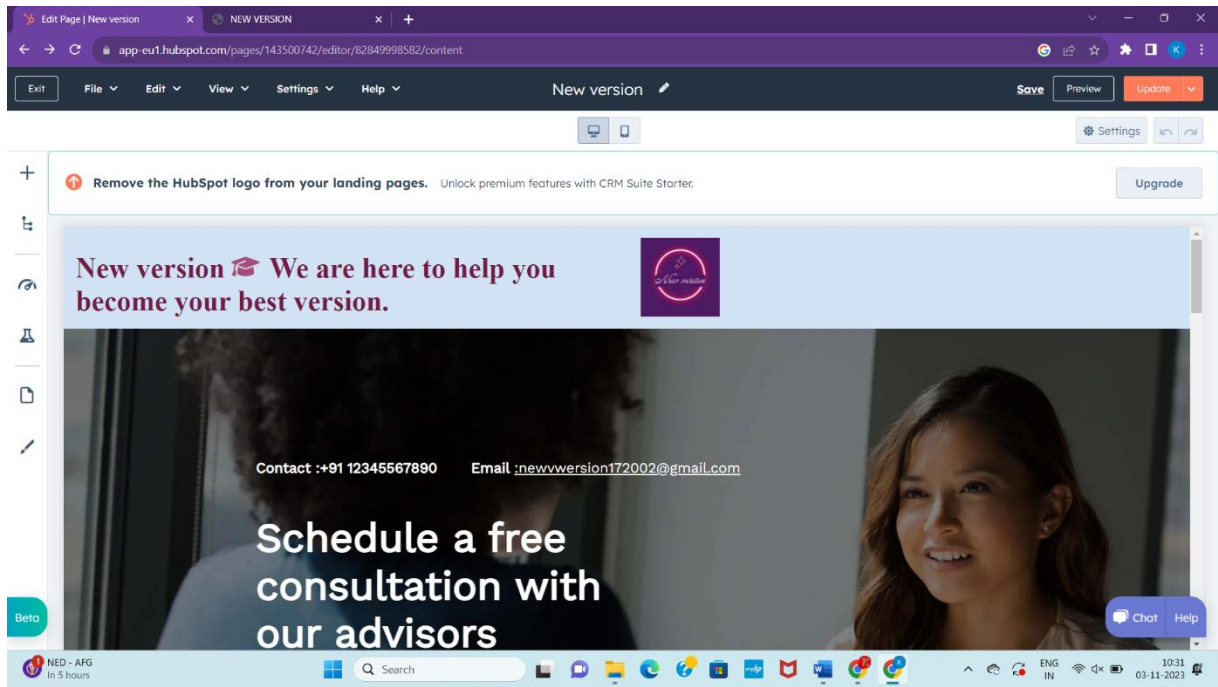

The screenshot displays the HubSpot Form Editor interface. On the left, a sidebar contains a 'Contents' panel with a 'Form' section. Below this, the 'Form' configuration panel is visible, showing the 'Form Title' as 'Registration Form', the 'Form' selection as 'New version form October 20, 202...', and the 'Form content' section. The main editor area shows a 'Registration Form' with three input fields: 'First Name', 'Last Name', and 'Email\*'. A blue 'Submit' button is located at the bottom right of the form. The top of the interface includes a navigation bar with 'Exit', 'File', 'Edit', 'View', 'Settings', and 'Help' menus, along with 'Autosaved', 'Preview', and 'Update' buttons. A banner at the top right encourages upgrading to CRM Suite Starter to remove the HubSpot logo.

Step :11

Add page title and content slug.

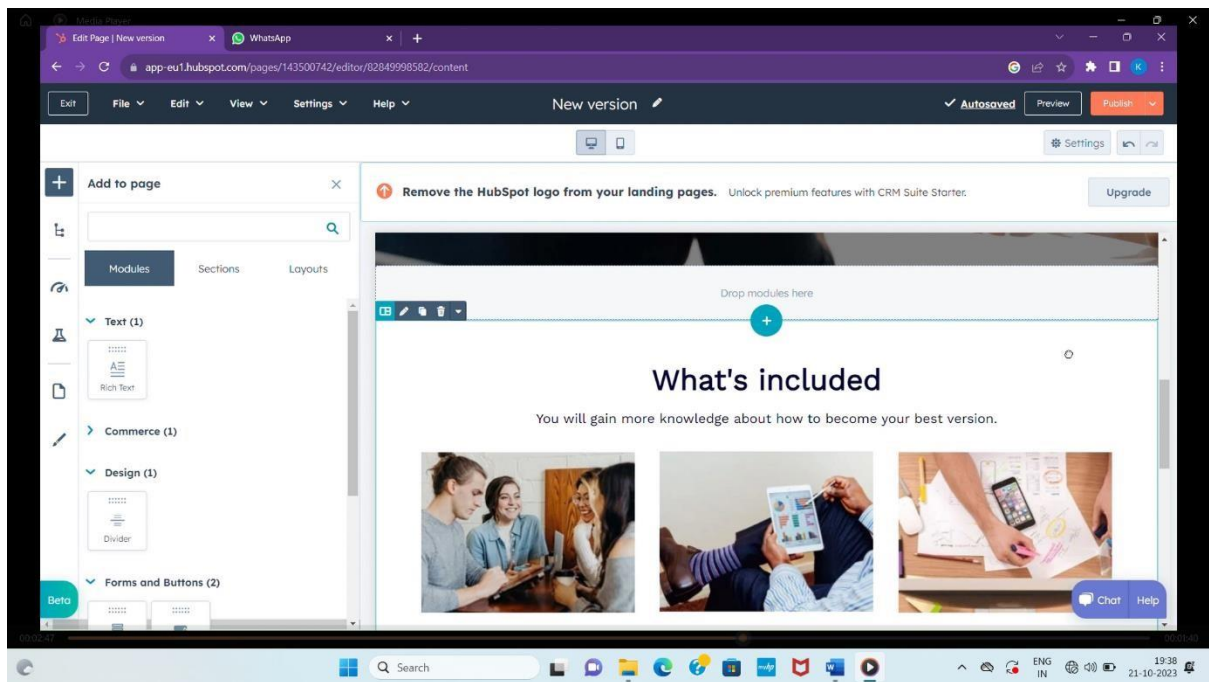

The screenshot shows the HubSpot Settings dialog box for a 'New version' page. The 'General' tab is selected, displaying fields for 'Page name', 'Page title', 'Page URL', and 'Meta description'. The 'Page name' field is set to 'New version'. The 'Page title' field is set to 'NEW VERSION', with a note indicating it is within the 59-character limit. The 'Page URL' field shows the URL 'new-version-143500742.hubspotpagebuilder.eu/new-version', with a 'Copy link' button. The 'Meta description' field is currently empty. The background of the editor is dimmed, showing a preview of the page content.

Step :12

Publish your Landing page.
